

This time clock provides flexible timing for daily and/or weekly programming. Setting the clock is simple and fast by means of push buttons and display prompts. This timer combines 24 hour/7 day timing. Up to 8 on/off operations are allowed for each day for a total of up to 56 switching cycles per week.

Minimum time setting is 1 minute. Lithium battery provides 5 year backup.

**Note:** to save time you can set up each on/off cycle;

- A) to be unique for each individual day, or
- B) for Monday to Friday, or
- C) for weekends only, or
- D) for all days except Sunday, or...
- E) the entire week at one time. This can save a lot of time when programming the “on” and “off” cycles.

**Directions:**

- Slide the “RUN” switch to “P”.
- Press the “Day” seven times and notice a single arrow will move in steps below the letters, indicating the individual days of the week
- The next time you press the button you will see days highlighted with arrows (Monday to Friday).
- The next time you press “Day” you will see arrows highlighting S and S (weekends).
- The next time you press “Day” you will see arrows highlighting all days except Sunday
- The next time you press “Day” you will see arrows highlighting all days of the week.

**#1 Setting the current time and current day:**

- Slide “RUN” switch to left symbol of clock face.
- Press "Day" button until arrow points to current day. Press “h” then “m” buttons to set the current time. The “PM” indicator shows noon to 11:59 p.m.
- Slide “RUN” switch to “RUN”. The clock colon will blink between the hours and minutes.

**#2 Setting each cycle to “switch on”**

- Slide the "RUN" switch to “ P ”, a “1” indicates this is the first switch cycle and a “bulb” icon indicates a switch-on condition (circuit closes). *(Hint: odd numbers indicate a “switch-on” cycle.)*
- Press day button until arrows point to selected day(s) you want this ON cycle to occur. *(see “Note” above instructing how to choose days of the week)*
- Press “h” and “m” buttons to show switch-on time, noting the “PM” indicator.

### **#3 Setting each cycle to “switch off”**

- Slide RUN switch to “ P “ press (P) button, note switch cycle number changes to 2 and bulb blinks, indicating switch-off (circuit opens). (*Hint: even numbers indicate a “switch-off” cycle.*)
- Press Day button until arrows point to selected day(s) you want this OFF cycle to occur.
- Press “h” and “m” button to select-switch-off time.

*\* Remember you can repeat the above steps to program up to 8 on/off events for each day of the week.*

*By pressing the lower (P) button you can advance to the desired on/off cycle.*

- Slide "RUN" switch to "RUN" position.
- The clock colon will blink.

### **#4 Autorun mode**

- Set time and day and desired switch cycles.
- Slide set switch to “RUN” and mode switch to “AUTO”. Switching will begin with the next switch-on set time.

### **#5 To switch the override ON**

- Slide mode switch to “ I ”.
- The switch remains on indefinitely (circuit closed).

### **#6 To switch the override OFF**

- Slide mode switch to “ 0 “. The switch remains off indefinitely (circuit open).

### **#7 Skip cycle**

- In automatic run mode, press the “Skip“ button, the next program is skipped

### **#8 Setting error**

- If “ EEE “ appears, a setting error exists. The switch cycle number in error is shown. Slide set switch to "P".
- Press button until cycle is shown. review this and the following setting to correct error slide set switch to “RUN“.

### **#9 Clear any setting**

- Slide the RUN switch to “ P “, press the lower (P) button to show switch cycle you want to clear.
- Press day button until no days are indicated. Repeat for the following switch cycle. This on/off cycle is now inactive.
